

SENIOR QUALITY ASSURANCE ENGINEER

Connecting Software is looking for a Senior QA Engineer. **Could that be you?** For this position, you can be based in Portugal (Madeira), and you must speak English. Please, read the entire announcement and be aware that all our processes are in English, and keep in mind this is not a **remote job**.

Interested in learning more? Here is what we are looking for, but with some level of flexibility:

- +2 years of experience as a QA Engineer (juniors are also welcomed!)
- Knowledge of C#, .NET framework, and SQL
- Selenium Framework or other automation frameworks
- Familiarity with CI/CD

Curious to know how your day shall be like? Check out your Job Scope:

- You will be performing quality assurance testing activities to ensure the applications and products and/or releases are in compliance with the Quality Assurance standards of the organization.
- Develop test plans, test scenarios, test cases, test data with automatic testing in mind for different types of testing activities.
- Implementation and execution of both manual and automated test cases, capture test results, test metrics, and report them.
- Build automated processes for testing to improve quality and throughput.
- Improvement of APIs user-friendliness by giving constant feedback to development team members.
- Identification and tracking system defects. You will perform root cause analysis of the defects and work with the Development Team to resolve them.

To cope with that, we need you to have some required skills:

- Be comfortable working with distributed version control systems and project management tools (GIT or similar). - Strong knowledge of software QA methodologies, tools, and processes.
- Good knowledge of Agile Testing methodologies (BDD, TDD).
- Familiarity with Virtualization tools and VM management (HyperV or similar).
- Familiarity with Cloud providers (Azure or similar).
- Solid knowledge of scripting.
- BS/MS degree in Computer Science, Engineering or a related subject

Finally, in terms of **soft skills**, it would be nice if you have the ability to organize and perform tasks, teamwork, proactivity, an eye for detail, and, last but (absolutely) not least, good English communication skills.

If you feel like you are a fit for us, apply today with your **resumé** and motivation letter in English (documentation in other languages will not be considered).

Send your CV to office@connecting-software.com & tell us why you're the one to work with us!

If you want to learn even more about us, we kindly invite you to reach out to us or to access our social media channels!

We are waiting for you!
